WEATHER OF CONCERN

NORTHERN CALIFORNIA

- Thursday winds will switch and become offshore out of the northeast and persist into the weekend.
 - Friday will see the strongest winds over the northern and central Sacramento Valley and adjacent foothills.
 - Gusts are expected to be 30+ mph. These winds combined with low relative humidity and very dry fuels will bring critical fire weather conditions.
 - The Fire Weather Watch has been upgraded to a Red Flag Warning Friday morning into Saturday morning.

SOUTHERN CALIFORNIA

- Excessive heat watch, San Diego County, in effect through Friday evening
 - Dangerously hot conditions with high temperatures of 110 to 115 degrees.
- Excessive heat watch, Southeast California, in effect from Wednesday morning to Friday evening.
 - Dangerously hot conditions possible. Afternoon temperatures 107 to 115.

WEATHER KEY POINTS

08/26/21 - 09/01/21

Thursday-Wednesday

- Critical fire weather conditions, with gusty winds and low humidity, are expected Friday morning through Saturday morning across the northern and central Sacramento Valley and adjacent foothills.
- Moderate to locally high heat risk impacts will increase across interior southern California and spread north over much of the Central Valley and even some coastal areas of central and northern California through the weekend as hot temperatures of 95-105 degrees develop
 - Even warmer readings in the 105-115 are expected across the inland southern deserts where Excessive Heat Warnings are in effect
 - Heat impacts will quickly diminish into early next week, especially after Monday
- Lighter winds in general will be noted across much of the state through Saturday, with two exceptions:
 - Breezy sundowner winds are expected across Santa Barbara County Thursday evening and night
 - Gusty north winds of 15-25 mph, gusting up to 35 mph are expected across Shasta County as well as the western Sacramento Valley and nearby foothills Friday morning through Saturday morning, leading to the possibility of critical fire weather conditions
- With the warmer temperatures will come lower humidity levels each day, with periods of poor overnight recovery into the weekend, especially for the foothills and mountains. Locally breezy winds will also pick back up Sunday into early next week, giving additional periods of localized elevated fire weather conditions.
- Periods of thicker wildfire smoke will continue to reduce air quality and visibility at times through the weekend, particularly across northern and central California
- Chances for scattered showers and thunderstorms will increase across southern California by later Sunday and persist through the middle of next week
